D-Link Building Networks for People DWL-G710 Wireless Range Extender

Expand Your Wireless Network

- Increase the Coverage Area of Your Wireless Network
- Works with Virtually All 802.11g Wireless Devices
- Supports WPA-PSK and WPA2-PSK for Ehanced Wireless Security
- Backward Compatible with 802.11b

D-Link, the industry pioneer in wireless networking introduces the latest product in the *Air*Plus® G family designed to increase the range of your wireless network – the DWL-G710 Wireless G Range Extender.

For users seeking a simple solution to improve the reach of their wireless signal within their home or office, the DWL-G710 is the answer. This Range Extender takes an existing 802.11g wireless signal and "repeats" it to enable wireless connectivity in the basement, patio, garage or any "dead spot" areas where your original wireless signal could not reach.

The DWL-G710 is capable of repeating the signal of virtually any 802.11g wireless router or access point out on the market today. At the same time, the DWL-G710 can still communicate with other 802.11b/g wireless client devices.

Setup takes only a couple of minutes and keeps your network free from additional cables. After quick configuration, place the Range Extender in close proximity of your wireless router or access point and begin offering a reliable connection to the rest of your home.

The DWL-G710 Wireless Range Extender also features WPA-PSK, WPA2-PSK and WEP for secure wireless communication over the network. With this level of security, your data is kept safe from the prying eyes of unauthorized users.

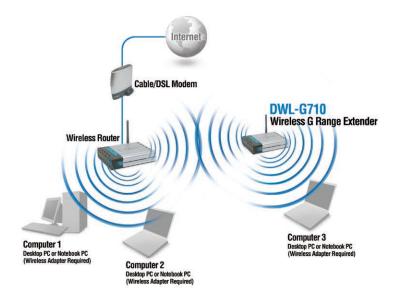

The DWL-G710 is the most cost efficient solution for increasing the range of your wireless network.

DWL-G710

The DWL-G710 offers a convenient solution for users

seeking to expand the range of their wireless network.

The DWL-G710 is capable of repeating the wireless signal of virtually all routers and access points on the market today.

SPECIFICATIONS

Standards

- IEEE 802.11b IEEE 802.3
- IEEE 802.3u • IEEE 802.11g

Device Management

 Web-Based – Internet Explorer v6 or later; Netscape Navigator v7 or later

Security

- 64/128-bit WEP
- WPA-PSK
- WPA2-PSK

Wireless Frequency Range

2.412GHz to 2.462GHz

Power

External Power Supply: DC 5V/2A

Power • LAN WLAN

Temperature

- Operating: 32°F to 131°F (0°C to 55°C)
- Storing: -4°F to 149°F (-20°C to 65°C)

Humidity

• 5%~95% (non-condensing)

Certifications

• FCC

• UL

Dimensions

- L = 5.59 inches (142mm)
- W = 4.29 inches (109mm)
- H = 1.22 inches (31mm)

Weight

• 0.44lbs (200g)

Warranty

• 1-Year

Maximum wireless signal rate based on IEEE Standard 802.11g specifications. Actual data throughput will vary. Network conditions and environmental factors including volume of network traffic, building materials and construction, and network overhead lower actual data throughput rate
